
ONE EMPIRE

2017 was the year to start afresh and that's exactly what the boys of 'ONEmpire' did! The band released their first single titled 'Shine a light' worldwide which included a special feature on the BBC Asian Radio Network in London.

ONEmpire is also the only act from India chosen to be on the upcoming "Music Minds" charity album being released in the UK by Ian Sephton in aid of Mental Health Awareness. A Gospel remix of the band's debut single 'Shine a light' is being featured as one of the lead singles on the album. In addition to that, the band was also chosen to be the opening act for world-renowned American Rock band OneRepublic for their concert in India.

ONEmpire has spent much of their time in the studio & on the road, traveling to various countries, performing at some of the biggest venues, parties & weddings around.

After a successful & popular few years under a different avatar, the band is now working towards becoming a part of the International music scene in the form of releases, collaborations & live performances.

The band's debut EP titled 'Humanity' is expected to release by early 2019.
